Crème de Cassis de Dijon

The fruit: "Noir de Bourgogne"

We have chosen the "Noir de Bourgogne" variety, recognised as being the noblest of all, since it has an outstanding aromatic quality. Our blackcurrants are 100% «Noir de Bourgogne», 100% Burgundian and 100% sustainable agriculture.

The geographical indication (IG Cassis de Dijon)

In 2012 Crème de Cassis de Dijon obtained a geographical indication. This IG protects Cassis de Dijon and guarantees its quality by imposing strict specifications.

The method: maceration

So as to extract the full aromas of the Noir de Bourgogne variety, we allow it to macerate for 10 weeks in neutral alcohol and water. The extraction of the alcoholic juice gives the infusion. We then add white sugar.

Our Range

We offer Crèmes de Cassis de Dijon with an alcohol content of 15 to 20 % with a progressive fruit and sugar weight.

Tasting

It can be enjoyed on its own or with ice cubes, with a white aligoté for a "blanc-cassis", with sparkling wine as a cocktail, or in the kitchen with melon, game, or as a dessert with vanilla ice-cream.

Our Digestifs

AOC Marc de Bourgogne and AOC Fine de Bourgogne

Our Vieux Marc and Vieille Fine de Bourgogne alcohols are aged in 228 litre barrels. The result is extreme smoothness and the development of this unequalled regional flavour.

Fine de Bourgogne 43%

(aging during 3 years minimum)

Vieux Marc de Bourgogne 40%

(aging during 3 years minimum)

Très Vieux Marc de Bourgogne 43%

(aging during 5 years minimum)

Nos eaux de vie

Our traditional brandies, distilled using methods handed down from generation to generation, bring out quality and authentic flavours.

Framboise (Raspberry) 45%

Kirsch 45%

Mirabelle (Cherry plum) 45%

Poire Emprisonnée (pear inside the bottle) 40%

Poire William (Pear) 45%

Quetsch 45%

Vieille Prune (Plum) 45%

Nos alcools fins

We offer a selection of Armagnac, Cognac, Calvados and Rhum of high quality.

Cognac Napoléon, XO 40%

Calvados VS, VSOP 40%

Rhum Agricole Ambré 40%

Rhum Agricole Blanc 54%

Strawberry Liqueur

Briottet's Wild Strawberry Cream is the result of macerating several varieties of strawberries, and this gives rise to the liqueur's inimitable wild strawberry taste.

Mango Liqueur

Our Mango Liqueur, which is both soft and a great way of treating oneself, seduces the drinker by means of its unique taste. It will provide an exotic and tropical touch in all of your cocktails.

Apricot Cream

For our apricot cream (25% alcohol content) we select the most delicious variety of apricot the Bergeron apricot. Harvested in the Rhone valley in France in the month of August we leave the apricots to macerate for more than two months in a mixture of water and very fine neutral alcohol.

Raspberry Liqueur

The raspberries are soaked in a water-alcohol solution for a minimum period of two months. This enables all the finesse of the small berries to be extracted.

White sugar is then added to the infusion obtained and this elegant Raspberry Cream is the result.

Creme De Mure

The recipe for this product has evolved as techniques have developed -- about 15 years ago, we made our Blackcurrant Cream using macerated blackberries. This technique did not bring out the fruit's true flavours. The extraction process employed to obtain the natural flavours of the blackberry is much more effective and it brings out all of the taste of the small fruit.

Ginger Liqueur

Our Ginger Liqueur is made from fresh ginger roots, which are macerated and then distilled. Following the addition of sugar, we obtain a powerful liqueur with a pronounced ginger taste.

PBC World Group, S.L

OUR CRÉMES & LIQUEURS

Best products combined with our know-how enable us to propose a wide range of premium liqueurs. "Crème" and "Liqueur" differ through the sugar content: a liqueur contains at least 100 g of sugar for 1 litre compared with 250 g for a crème. Exception : Crème de Cassis de Dijon with 400 g minimum of sugar per liter
